NetTrek — Game Legend & Inventory

A complete reference of every item, enemy, boss, and hazard in the game. Source of truth: `src/shmup/`. Keep this in sync when content changes.

NetTrek is a music-reactive vertical-scrolling space shoot-'em-up with a Star Trek aesthetic. The music *is* the level — each song is a stage with its own signature mechanic, fleet composition, and pacing.

Power-ups (collectibles)

Floating pickups that drift down the screen. Touch them to collect. Each has a distinct **color** and **shape** so it reads at a glance.

Item	Color	Shape	Effect
Weapon	Cyan #00ccff	Hexagonal crystal prism — this is the “blue diamond”	Main cannon +1 level (max 5). Each level adds shots / spread.
Crew	Amber #ffcc66	Away-team figure	Wing guns +1 (max 4); if maxed, main cannon +1; if all maxed, +1 shield.
Shield	Green #44ff44	Heraldic shield with cross	+1 shield layer.
Coin / Star	Gold #ffdd00	Spinning gold coin	Currency. Spend in the Hangar on upgrades.
Bomb	Red #ff4444	Black sphere, lit fuse	+1 screen-clearing bomb in reserve.
Magnet	Pink #ff88ff	Horseshoe magnet	Auto-pulls coins toward you for ~10s.
Missile	Orange #ffaa00	Rocket	Homing missiles +1 level (max 3).
Laser	Magenta #ff44ff	Diamond prism with beam	Laser beam +1 level (max 2).
Phaser	Orange #ff8833	Triangular emitter	Phaser +1 level (max 3). First pickup unlocks the lock-on beam.
Life	Salmon #ff8888	Pulsing heart gem	+1 extra life.
EMP	Light blue #44ddff	Lightning bolt	Freezes all enemies ~2s, deals 2 damage, clears all enemy bullets.
Overdrive	Orange #ff6600	Flame	Double fire-rate for 7s.
Drone	Green #44ffaa	4-point star-ship	Deploys a wingman drone that fires for 25s.
Score x2	Yellow #ffff00	x2 badge	Doubles score earned for 10s.

The blue diamonds you’ve been seeing are the **Weapon power-up** — your single most important pickup. Grab every one; it levels your main cannon.

Player weapons

Your ship’s arsenal. Levels are bought in the Hangar or found as power-ups.

Weapon	Max Lvl	Behavior
Main Cannon	5	Auto-fires forward. Levels add bolts: single → twin → triple → 5-spread → white-hot quad.
Wing Guns	4	Side-mounted auto-fire. Crewed by away-team pickups.
Missiles	3	Homing warheads with smoke trails.
Laser	2	Magenta continuous beam segment (special-fire).
Phaser	3	Charge-based lock-on beam. Locks a target until destroyed or power drains, then recharges.
Bomb	5 held	Manual screen-clear — wipes bullets and damages everything.

Enemy ships

Five non-boss classes. Each has a unique movement style and weapon profile.

Enemy	HP	Movement	Weapon	Notes
Fighter	6	Patrol / dive / formation	Fast laser bolts	Cheap, swarms. Pawn formations use 2-HP variants.
Bomber	18	Slow drift descent	Drifting mines (long-life orbs)	Weighty, fires rarely.
Cruiser	55	Patrol — settles, strafes	Plasma blobs (3-shot)	Mid-weight, diamond/rhombus silhouette.
Elite	95	Orbit / spiral	Homing orbs	Aggressive, hard to predict.
Turret	35	Anchors near top of screen	Precision needles	Stationary platform.

HP shown is the base value. Actual HP scales with stage, time, and **your loadout** — a maxed-out ship faces ~2.4x tougher enemies so the game stays challenging.

ENEMY BULLET COLOR = THREAT

All enemy fire is hot magenta-red. If it's that color, it can hurt you — navigate around it. Your own fire is cyan/blue/orange. This is a deliberate readability rule.

Bosses

One per stage (11 total). Each has named, **destroyable subsystems** — you must take out the weapon hardpoints before the main hull becomes vulnerable. A bright hex shield bubble means the hull is still protected.

Stage	Boss	Type	Faction	HP	Phases
1	T'VAK Class Assault Vessel	tvak	Klingon	1200	4
2	IRW Valdore	dreadnought	Romulan	350	4
3	Orion Flagship	flagship	Orion	500	5
4	Singularity Marauder	gravitymarauder	Romulan	650	4
5	Anomaly Guardian	guardian	Klingon	600	4
6	Rift Sovereign	sovereign	Romulan	700	4
7	Fortress Command	fortress	Orion	1000	5
8	Singularity Dreadnought	singularity	Klingon	1200	5
9	Event Horizon Tyrant	voidtyrant	Klingon	1500	5
10	Phase Wraith	wraith	Romulan	1400	5
11	OMEGA SUPREME	omega	Orion	2000	6

T'VAK has 6 named hardpoints: Disruptor, Missile, Plasma, Tractor, Phaser, Torpedo. Bosses get more aggressive each phase as HP drops.

Obstacles (music-director hazards)

Spawned by the music director, not scripted. Some are destroyable, some must be dodged.

Obstacle	Behavior
Rock	Asteroid. Destroyable.
Mine	Explodes on contact. Destroyable.
Barrier	Solid wall segment — block it or thread the gap.
Vortex	Gravity well — pulls your ship in. Indestructible; endure it.
Comet	Fast-moving body with a particle tail.
Energy Ribbon	Flowing aurora stream that weaves across space.
Splitter	Volatile asteroid — breaks into fragments when destroyed.

Terrain (scenic walls)

Scrolling environmental walls with a gap to fly through.

Terrain	Damaging?
Canyon	Yes — solid rock, contact = death
Asteroid Corridor	No
Station Debris	No
Wormhole Tunnel	No
Crystal Field	No

Signature mechanics (per-song)

Triggered on musical drops. Each stage's song has its own: curtain (rising bullet wall), pulse walls (scanning energy lines), vortex storm (three gravity wells), swarm, siege, finale.

HUD reference

- **Top bar** — armory: GUN / WNG / MSL / LSR / PHS / SHD / BMB / LOK (lock-on phaser charge). Pips show level; slot pulses on upgrade.
- **Bottom-left panel** — hearts (lives, pulse red at 1), shield bars, score, combo multiplier.
- **Bottom-right** — coin count.
- **Top-left EQ** — live music waveform (Bass / Mid / High); flashes on beat.
- **Combo aura** — glowing ring around your ship; yellow→red as the kill chain climbs.

Combat feedback cues

You see	It means
Enemy flashes white	It took a hit
Cyan sparks bouncing off a boss	Hull is shielded — destroy subsystems first
Yellow sparks on a boss	You hit a weak point — keep firing there
Hot magenta-red projectile	Enemy fire — dodge it
Screen edge red vignette	You took damage
Bright hex bubble on boss	Subsystems still up; hull invulnerable
